

Improving Asthma Management

Thursday 4th February 2027

Online Programme

09:00am – 09:10am	Welcome & Introduction
09:10am – 09:35am	Challenges in diagnosis: understanding the strengths and limitations of measuring airflow obstruction and airways hyper-responsiveness
09:35am – 10:00am	Translating immunology to the nurse-led clinic: T2 biomarkers & steroid stewardship
10:00am – 10:25am	Predicting exacerbations and other learnings from big data
10:25am – 10:35am	Panel Discussion
10:35am – 11:00am	SCREEN BREAK
11:00am – 11:25am	Revisiting the evidence 1: Who are the right patients for montelukast?
11:25am – 11:50am	Revisiting the evidence 2: Who are the right patients for LAMA therapy?
11:50am – 12:15pm	Revisiting the evidence 3: Who are the right patients for maintenance macrolide therapy?
12:15pm – 12:25pm	Panel Discussion
12:25pm – 1:00pm	LUNCH BREAK
1:00pm – 1:25pm	More than just asthma 1: Treating and monitoring ABPA
1:25pm – 1:50pm	More than just asthma 2: Laryngeal obstruction
1:50pm – 2:15pm	More than just asthma 3: EGPA & Eosinophilic Pneumonia

2:15pm - 2:40pm	More than just asthma 4: Work-related asthma
2:40pm – 2:50pm	Panel Discussion
2:50pm – 3:05pm	SCREEN BREAK
3:05pm – 3:30pm	Biologics 1: Severe asthma phenotypes and selecting the right biologic first-time
3:30pm – 3:55pm	Biologics 2: Exacerbation phenotyping and understanding biologic failure
3:55pm – 4:20pm	Biologics 3: What to do in pregnancy
4:20pm – 4:30pm	Panel Discussion
4:30pm – 4:35pm	Meeting summary and close
